QUALITY BOND MEMBERSHIP POLICY

This Quality Bond Certificate and the following provisions (hereinafter referred to as the "Certificate") shall govern the relationship between Dow Corning and the Quality Bond Membership applicant as identified hereunder with regard to non-staining sealant applications, insulating glazing sealant applications, structural glazing sealant applications and weatherseal sealant applications (hereinafter referred to as the "Building Sealant Applications").

Any party who consistently and successfully meets the Quality Bond Membership Qualification Criteria (Version July 2006), details of which are available upon request from the nearest Dow Corning representative, can apply for this membership at any time.

Provided said Quality Bond Membership Qualification Criteria are met by the applicant to the satisfaction of Dow Corning, including the applicant's production site audit, this Certificate is granted to the applicant who shall then officially become a Quality Bond Member for a twelve-month period, at the end of which this Certificate will automatically be cancelled.

Upon such cancellation date or at the earliest date thereafter, the Quality Bond ex-Member shall successfully pass another production site audit with respect to its Building Sealant Application knowledge and related processes as well to other non-process qualification criteria to obtain the renewal of its Quality Bond Certificate for another twelve-month period.

Upon the grant or the renewal of the Certificate as per the above procedure, the new or renewed Quality Bond Member hereby warrants that it will continuously meet the Quality Bond Membership - Qualification Criteria (Version July 2006) for the entire duration of said new or renewed Certificate.

By being qualified under this Certificate, the Quality Bond Member further acknowledges and agrees that the remedy for defective Dow Corning products shall be governed by the relevant limited warranty provisions applicable to the concerned Building Sealant Applications as well as by the current applicable Dow Corning terms and conditions of sales. However, to the extent there may be a conflict between this Dow Corning limited warranty and such Dow Corning current terms and conditions of sales, the provisions of said limited warranty shall prevail.

Usage by Quality Bond Member of non-Dow Corning products for any Building Sealant Application under this Quality Bond Certificate would permanently and immediately cancel the membership of such Quality Bond Member, including any right to make reference to Dow Corning trade name, logos or promotional material in any shape or form, as well as any relating Dow Corning limited warranty.

This Certificate shall be interpreted, construed and governed by the laws of Belgium and shall be effective as of the effective date of the Dow Corning signature hereon.
